

Arrondissement Errata 1

Rules:

3 value phase:

It is possible that the action card deck contains not enough cards when Arrondissements are valued. To decide which arrondissement is valued first, use the turn cards.

If the action card deck contains only one card, and two players should get an action card because of a draw; then the player who played first that round will get the remaining card.

End of the game:

If two players have the same amount of points at the end of the game, the winner is the player who played first in the last round (the ninth).

Alternative Card Descriptions:

Tactical Exchange:

Take one influence from one arrondissement and exchange this with one influence from an other arrondissement.

Political Favouritism:

Take one influence from the board and replace it with one influence from your stock.
